## **PROTECTIVE CAPS FOR REBAR, PIPE, BOLTS**

### **AZA1024**

The AZA1024 Protective Caps are heavy-duty, multi-purpose safety accessories designed to protect workers, equipment, and exposed metal components in construction sites, industrial facilities, and fabrication environments. These caps provide an effective solution for covering rebars, pipe ends, bolts, and threaded rods, reducing injury risks while preventing environmental damage.

Engineered for impact resistance, durability, and compliance, the AZA1024 enhances both site safety and material longevity.

#### **Key Features & Benefits**

- High Impact Resistance

Manufactured from durable plastic or thermoplastic rubber (TPR)

- Enhanced Safety Visibility

Available in bright yellow, orange, and red colors

- Secure Fit Design

Ribbed inner profile ensures tight, non-slip grip

- Weather & UV Resistant

Suitable for prolonged outdoor exposure

- Reusable & Cost-Effective

Designed for multiple usage cycles after inspection

- Optional Steel Reinforcement

Steel-insert variants provide enhanced impalement protection

**TECHNICAL SPECIFICATIONS**

<b>Feature</b>	<b>Description</b>
Model	AZA1024
Material	High-impact plastic / Thermoplastic rubber
Size Range	8 mm – 40 mm (custom sizes available)
Color Options	Yellow, Orange, Red
Insert Option	With or without steel plate
Weather Resistance	UV, water, and dust resistant
Standards Compliance	OSHA, ASTM, IS
Reusability	Yes (after inspection)
Packaging	100 – 500 pcs per box (size dependent)
