ROUND POST HOLE FORM AZA1020

The AZA1020 Round Post Hole Form is a high-performance cylindrical formwork solution designed for creating uniform, high-strength concrete footings for posts, poles, and light structural foundations. It ensures accurate geometry, efficient installation, and consistent load-bearing performance, making it suitable for both professional contractors and serious DIY applications.

Engineered for reliability and ease of use, the AZA1020 enables clean finishes, reduced material wastage, and faster project execution across a wide range of construction tasks.

Feature	Details
Material Options	HDPE / Polypropylene / Fiber Cardboard
Diameter Options	150 mm / 200 mm / 300 mm
Height Options	600 mm / 900 mm / 1200 mm
Surface Finish	Smooth internal finish
Application	Posts, poles, deck footings
Reusability	Reusable (plastic) / Single-use (cardboard)
Weather Resistance	Yes (UV & moisture-resistant variants)
