

UNIVERSE SAMPLING BOWLS AZA1051

The AZA1051 Sampling Bowls are high-quality, stainless steel containers designed for sample collection, preparation, mixing, weighing, and handling across laboratory, industrial, construction, and food-processing environments.

Manufactured from premium AISI 304 stainless steel, these bowls provide excellent corrosion resistance, durability, and hygienic performance, ensuring contamination-free sample handling and long service life.

KEY FEATURES

- Manufactured from high-grade stainless steel (AISI 304)
- Rust-proof, corrosion-resistant, and non-reactive surface
- Mirror-polished interior for easy cleaning and minimal residue retention
- Wide open mouth for convenient handling and mixing
- Flat, stable base for secure placement
- Autoclavable for sterile applications
- Stackable design for efficient storage
- Suitable for solids, liquids, and semi-solid materials

AVAILABLE SIZES

DIAMETER
25 cm
30 cm
40 cm
