## **STOPPER FOR PLASTIC CUBE MOULD AZA1130**

The Azalab Plastic Stopper Set (AZA1130) is designed to provide a reliable, leak-proof seal for standard 150 mm plastic concrete cube moulds. These precision-moulded plugs effectively seal drainage or vent holes, preventing slurry leakage during casting, vibration, and compaction.

Manufactured from high-density, chemical-resistant polymer, the stoppers offer excellent flexibility, durability, and repeated usability. The friction-fit design ensures quick installation and removal without damaging the mould.

### **Key Features**

#### Leak-Proof Sealing Solution

- Prevents slurry loss during pouring and compaction

#### Durable Polymer Construction

- Resistant to chemicals, wear, and repeated use

#### Friction-Fit Design

- Easy insertion and removal without tools

#### Reusable & Washable

- Suitable for multiple testing cycles

#### Standard Compatibility

- Fits most 150 mm plastic cube moulds

**TECHNICAL SPECIFICATIONS**

<b>Parameter</b>	<b>Details</b>
Model No.	AZA1130
Material	High-density flexible polymer
Compatibility	150 mm plastic cube moulds (with vent/drain holes)
Quantity	Pack of 10 pieces
Color	Black
Seal Type	Friction-fit / compression plug
Reusability	Yes (washable and reusable)
Standard Compliance	IS 516, ASTM C109, BS EN 12390
