WATER TESTING KIT AZA0888

The AZA0888 Water Testing Kit is a comprehensive and user-friendly solution designed for the rapid assessment of water quality parameters. Suitable for household, laboratory, educational, aquarium, and industrial applications, this kit enables users to monitor critical water characteristics and ensure safety, compliance, and operational efficiency. Engineered for on-site testing, the AZA0888 eliminates the need for complex laboratory equipment, providing fast, reliable, and easy-to-interpret results for both professionals and non-specialists.

Key Features & Benefits

- All-in-one testing capability for multiple water quality parameters
- Rapid results within minutes using combined test methods
- User-friendly operation with no specialized training required
- Portable and rugged design for field and on-site use
- Multiple kit configurations to suit varied applications
- Accurate and repeatable results for reliable monitoring

Applications

- Drinking Water & Well Water Testing
- RO and Filtered Water Verification
- Aquariums & Aquaculture
- Educational Demonstrations
- Water Treatment Plants
- Industrial & Field Inspections

UNIVERSE TECHNICAL SPECIFICATION

Parameter	Range / Accuracy
pH	4.5 – 10.0 (± 0.2)
Total Hardness	0 – 1000 ppm
Chlorine (Free/Total)	0 – 10 ppm
Alkalinity	0 – 240 ppm
Nitrate / Nitrite	0 – 50 ppm
Iron	0 – 5 ppm
TDS (Digital Meter)	0 – 9990 ppm
Test Method	Strip / Reagent / Digital
Kit Variants	Basic / Standard / Advanced
Case Material	High-quality Plastic / Aluminum
