WOOD WORKING BASIC ROUTER AZA1206

The AZA LAB Wood Working Basic Router – Model AZA1206 is a high-performance, precision routing tool designed for professional woodworking applications. Engineered with a powerful motor and fine adjustment controls, this router ensures smooth operation and accurate cutting across a variety of wood materials, including hardwoods.

With its fixed-base configuration, micro-fine depth adjustment system, and quick-change mechanisms, the AZA1206 offers reliability, efficiency, and ease of use for workshops, carpenters, and production environments.

Key Benefits

- High power for smooth routing in hardwood and dense materials
- Micro-fine depth adjustment for precise cutting control
- Quick and tool-free adjustments for improved productivity
- Compact and ergonomic design for easy handling
- Consistent performance for professional woodworking tasks

Applications

- Edge profiling and trimming
- Grooving and slot cutting
- Decorative woodworking and shaping
- Cabinet and furniture manufacturing
