## **WOOD WORKING DRUM SANDER AZA1239**

The AZA1239 Wood Working Drum Sander is a high-performance sanding machine engineered for efficient, accurate, and uniform surface finishing of wooden panels, boards, furniture components, and wide workpieces.

Designed for professional woodworking workshops, furniture manufacturers, and advanced woodworking applications, the AZA1239 delivers smooth and consistent sanding performance with excellent material removal control and surface finish quality.

Equipped with a powerful 1-3/4 HP drum motor, intelligent Sandsmart™ load monitoring technology, and a precision conveyor system, the machine is capable of sanding:

- Panels up to 25 inches wide in a single pass
- Panels up to 50 inches wide in two passes

Its rugged industrial construction, precision adjustment systems, and user-friendly operation make the AZA1239 an ideal solution for high-quality woodworking finishing applications.

### **Standard Supply Includes**

- Drum sanding machine
- Machine stand with leveling feet
- Conveyor system
- Abrasive sanding setup
- Dust hood assembly
- Standard accessories
- User operation manual

## UNIVERSE TECHNICAL SPECIFICATIONS

Parameter	Specification
Model No.	AZA1239
Machine Type	Wood Working Drum Sander
Drum Motor Power	1-3/4 HP
Maximum Sanding Width (Single Pass)	25"
Maximum Sanding Width (Two Passes)	50"
Drum Diameter	5"
Drum Speed	1,720 RPM
Feed Rate	0 – 10 feet per minute
Conveyor Motor	DC Motor, 43 in-lbs Torque
Conveyor Belt Material	Reinforced Steel
Dust Port Diameter	4"
Depth Scale	Relative
Adjustable Tension Rollers	Yes
Machine Dimensions	60" × 24" × 51"
Approx. Weight	230 lbs
