

UNIVERSE STRONG ACID & ALKALI STORAGE CABINET AZA1308

The AZA1308 Strong Acid & Alkali Storage Cabinet from AZA Lab is specifically engineered for the safe storage of highly corrosive, toxic, and hazardous chemicals in laboratory and industrial environments. Manufactured from premium-grade polypropylene (PP), the cabinet delivers exceptional resistance against strong acids, alkalis, and aggressive chemical substances, ensuring long-term durability and operational safety.

Designed for pharmaceutical laboratories, semiconductor facilities, food laboratories, chemical research centers, electronics industries, and industrial chemical storage areas, the AZA1308 series provides reliable chemical containment, organized storage, and enhanced personnel protection.

Available in multiple sizes and storage capacities, the AZA1308 series supports a wide range of laboratory storage requirements while maintaining high safety standards and corrosion resistance.
