## HEAVY DUTY PLASTIC PALLET AZA1324

The AZA1324 Heavy Duty Plastic Pallet from AZA Lab is a robust industrial-grade pallet engineered for demanding material handling, warehousing, logistics, and export applications requiring high durability, hygiene, and operational efficiency.

Manufactured from high-density polyethylene (HDPE), the pallet provides outstanding resistance to impact, moisture, corrosion, and industrial chemicals, making it suitable for both indoor and outdoor environments. Its heavy-duty construction ensures reliable performance under high static and dynamic loads while maintaining dimensional stability during repeated handling operations. The pallet features a smooth plain-top surface for easy cleaning and sanitation, combined with a stable 3-runner bottom structure for enhanced forklift handling and load distribution. Designed for long service life and low maintenance, the AZA1324 is ideal for logistics centers, manufacturing plants, food processing facilities, pharmaceutical industries, and export packaging operations.

Parameter	Specification
Model No.	AZA1324
Product Type	Heavy Duty Plastic Pallet
Material	High-Density Polyethylene (HDPE)
Colour	Blue
Top Surface	Plain
Bottom Design	3 Runner
Racking Compatibility	Non-Rackable

## UNIVERSE DIMENSIONS & WEIGHT

Parameter	Specification
Length	1200 mm
Width	1200 mm
Height	170 mm
Weight	19.85 kg $\pm$ 5%

## LOAD CAPACITY

Parameter	Specification
Static Load Capacity	3000 kg
Dynamic Load Capacity	1500 kg

## Load Definitions

- Static Load Capacity: Maximum load supported while stationary on a flat surface
- Dynamic Load Capacity: Maximum load supported during movement using forklifts or pallet jacks
